Projects Handled:

Project: OptionsHouse

Client: E*TRADE

Role: Lead Developer

Description: Options House is the powerful research and trading web platform & mobile recently acquired by E*TRADE and migrated to new technology. We developed the application using ReactJS, Redux.

Project: E*TRADE

Client: E*TRADE

Role: Lead Developer

Description: E*TRADE is a leading financial services company. It is an online discount stock brokerage firm for self-directed investors. E-Trade Financial also provides banking services to retail investors, such as sweep deposits and savings products. We developed the trading web platform using AngularJS, Bootstrap, Jasmine, and Protractor.

Project: Directseats.com

Client: Capdigisoft Solutions

Role: Software Engineer

Description: Directseats.com is the Online ticket booking website/Application for your sports, concert and theater tickets. Direct Seats is a privately held organization based in Dallas, Texas run by a team of professionals, which includes both ticket brokers and technology experts. We developed the application using PHP, MYSQL, MVC, CSS, JQUERY, and JSON.

Project: OPWDecks

Client: OPWDecks

Role: Software Engineer

Description: OPWDEcks.com is the Largest source of Company in US and provides Wood services and Paint Manufacturing. Online store with Buyers Friendly Functionalities. We developed this e-Commerce platform using PHP, MYSQL, HTML, AJAX, CSS, JQUERY, and JSON

Project: Medical Legal Spider

Client: Capdigisoft Solutions

Role: Software Engineer

Description: Medical Legal Spider is the online medical document processing system. Medical Legal Spider takes raw, unorganized medical records and gives you an easy to use, organized medical file or factual summary in the exact format that works best for their firm. We developed this web platform using HTML, AJAX, CSS, Bootstrap and JQUERY.

Project: Vizi360

Client: Capdigisoft Solutions

Role: Junior Software Engineer

Description: The Medical Reports Viewing System is dedicated to the Patients and labs who intend to store the records online. The system creates Executives for each process that would process the Medical Reports and upload. The documents processed and which are under processing are separately by the software and it synchronizes once all the documents are fully processed. We developed this web platform using PHP, MYSQL, JavaScript, Bootstrap and JQuery

Personal Traits

- ✓ Quick learner and hard worker.
- ✓ Good leadership and organizing ability.
- ✓ Eager to become an Entrepreneur.
